(It seems probable that these are all the same couple, as it would be unlikely that there was more than one person of each name in a small village that would be married at the same time, and the cause for the confusion is probably due to transcription errors).

It is possible that the 2 Thomas's are not related. The second Thomas could belong to another set of parents also called Thomas & Elizabeth, as these seem to be the most common names in this branch of the family. In the 1841 Census Elizabeth <sup>(3590)</sup> is recorded living by herself at The Mill Street, Kelvedon.

All baptized at Kelvedon near Colchester, Essex. Thomas <sup>(3163)</sup>, the father, died in 1819 at Kelvedon

**This next section contains information gathered from the BMD Register Index's.**

The individuals listed below are, as yet unconnected to the family, although they may already appear in one of the branches, but because of the limited amount of information from the Registers, it has not been possible to match the individual record with any known member of the family. This is especially so with the more common names such as John, Elizabeth etc. They are listed alphabetically to help in linking individuals together.

All place names listed in this section are Registration Districts, and not actual places of birth. The number in front of the year denotes the quarter registered.

Also many of the adult female deaths are probably wives of Fairhead's, and if they are listed in the booklets they will be listed under their maiden names, if they are in this section it means there is not enough information to link them to a known individual.

At the bottom of this section are family groupings, which have been constructed from the information below.

Where a birth date is given as "abt" this means that it was calculated from the age given at death, listed in the index's. This age was given from 1866 onwards.

For marriages the Spouses maiden name was listed from 1912 onwards. Before this date they are listed as "spouse unknown".
